

Data Acquisition Of Internal Combustion

A&D's Combustion Analysis Systems are high-performance data acquisition systems designed specifically for combustion analysis of two-stroke and four-stroke gasoline or diesel internal combustion engines. CAS software, together with A&D's new portable low-cost Phoenix hardware or the traditional Redline CAS hardware, offers ultra-high-speed data acquisition and real-time processing. CAS digitizes pressure signals from piezoelectric in-cylinder transducers and synchronizes the data with a ...
